

ABHINANDAN VERMA

Aspiring Software Development Engineer

New Delhi, India | [+91 8576984347](tel:+918576984347) | abhinandanmaurya10@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY:

MCA (2027) candidate aspiring to build a career as a Software Development Engineer, with a strong interest in problem-solving, web development, and machine learning. Proficient in DSA, OOP, SQL, REST APIs, and modular application development, with hands-on experience building data-driven and automation-focused applications. Eager to learn, tackle challenging problems, and contribute to scalable, production-ready software.

TECHNICAL SKILLS:

Programming Languages: Python, C, JavaScript, SQL

Core Computer Science: Data Structures & Algorithms (DSA), (OOPs), DBMS, Operating Systems, Computer Network.

Software Development: REST APIs, Backend Development, API Integration, Modular Application Design

Web Development: HTML5, CSS3, JavaScript, React.js, Tailwind CSS, Bootstrap

Databases: MySQL, MongoDB

Machine Learning & Data: NumPy, Pandas, Scikit-learn, Exploratory Data Analysis (EDA), Data Cleaning

Developer Tools: Git, GitHub, VS Code, Postman, Jupyter Notebook

Soft Skills: Problem Solving, Analytical Thinking, Communication, Team Collaboration, Adaptability, Continuous Learning

PROJECTS:

Adaptive Smart Traffic Signal System | [GitHub](#) | [Live Demo](#)

- Built a real-time traffic-signal simulation in python and Streamlit that adjust timing based density instead of a fixed schedule.
- Design a rule base-based, priority-driven scheduling algorithm accounting for waiting time pedestrian requests, and emergency-vehicle overrides.
- Added an interactive dashboard comparing adaptive vs fixed-time signals to visualize measurable efficiency gains.

Jarvis – Personal AI Assistant | [GitHub](#)

- Built a voice-activated Python assistant that understands spoken commands and replies through natural speech(pytttsx3, SpeechRecognition).
- Added OpenCV-based face detection, system automation, and live weather/battery status via psutil and the OpenWeather API.
- Integrated the Google Gemini API to handle open-ended conversational queries.

AI-Enabled-Fintech-B2B-invoice-manangement | [GitHub](#)

- Gathered dummy invoice data of 50000+ invoice records, running EDA and feature engineering to prepare the data modeling.
- Train and evaluated regression algorithms to predict invoice-related outcomes.
- Build a simple UI to present model predictions in a way non-technical stakeholders can understand.

CodeSense – AI Powered Code Review Platform | [Github](#)

- Built a full-stack web application leveraging Google Gemini 2.5 Flash to analysis across 7 programming languages.
- Implemented detection of syntax, logic, performance, and security issues, plus automated quality scoring and corrected-code suggestions.
- Added JWT-based authentication and MongoDB-based review history with analytics dashboards.

CERTIFICATIONS:

- Data Analytics Professional Certificate — Coursera
- Web Development Certificate --- Coursera
- 5-Day Generative AI Intensive / AI Agents Course — Google & Kaggle
- Generative AI Essentials — TCS Foundation

POSITIONS OF RESPONSIBILITY:

- Part of Robotics Society as a volunteer
- Part of Eco - Warriors Society as a volunteer

EDUCATION:

Master of Computer Applications (MCA) — *Abdul Kalam Technical University* | Pursuing (2nd Year) | CGPA: 8.3

B.Sc. in Mathematics — *Veer Bahadur Singh Purvanchal University* | 2025 | CGPA: 7.4
